Professional Summary

Here are a few professional rewrites of your summary, each emphasizing different aspects: **Option 1 (General & Concise):** > Highly motivated computer science graduate with a strong foundation in web development and a keen interest in pursuing opportunities in artificial intelligence and automation. **Option 2 (Emphasis on Skills):** > Computer science graduate proficient in web development, seeking a role where I can leverage my skills and contribute to innovative projects in AI and automation. **Option 3 (Focus on Future Contributions):** > Recent computer science graduate with a background in web development and a strong desire to contribute to advancements in artificial intelligence and automation. Eager to apply my technical skills to solve complex challenges. **Option 4 (More Detailed):** > Computer science graduate with practical experience in web development and a demonstrated passion for exploring the potential of artificial intelligence and automation technologies. I am actively seeking opportunities to further develop my expertise and contribute to impactful projects in these fields.

Key improvements in these rewrites:

- Stronger vocabulary:** Replaced weaker words like "passion" with more professional terms like "keen interest," "strong desire," or "demonstrated passion."
- Action-oriented language:** Used phrases like "pursuing opportunities," "seeking a role," and "contribute to advancements" to showcase proactiveness.
- Conciseness:** Eliminated unnecessary words and phrases to create a more impactful message.
- Focus on value:** Highlighted how you can contribute to potential employers.
- Use of "actively seeking" or "eager to apply":** Conveys immediate availability and enthusiasm.

Choose the option that best aligns with the specific role or situation you're targeting. Good luck!

Professional Experience

Frontend Developer

ET Inclusive Finance | 2022–2024

Here are a few options for polishing that job description bullet point, depending on the specific focus you want to emphasize: **Option 1 (Focus on Impact and Numbers):** "Developed and implemented multiple user interfaces for fintech applications using React, resulting in a 40% performance improvement." **Option 2 (Focus on Technical Skills and Problem-Solving):** "Leveraged React to design and build user-friendly interfaces for several fintech products, optimizing performance to achieve a 40% increase in efficiency." **Option 3 (More Detail - if you have space):** "Designed and developed user interfaces for multiple fintech applications using React. Identified and addressed performance bottlenecks, resulting in a 40% reduction in page load times and improved user experience." **Option 4 (Focus on Collaboration and the User):** "Collaborated on the development of multiple React-based user interfaces for fintech products, focusing on user experience and performance optimization, resulting in a 40% improvement in efficiency metrics." **Option 5 (Concise and Action-Oriented):** "Built React-based user interfaces for fintech applications, achieving a 40% performance enhancement."

Why these are improvements:

- Stronger Verbs:** Using verbs like "Leveraged," "Implemented," "Optimized," and "Designed" are more impactful than "Developed."
- Quantifiable Results:** Highlighting the 40% improvement is excellent. The more specific you can be (e.g., "40% reduction in page load times"), the better.
- Context:** Adding context like "for fintech applications" helps the reader understand the industry and type of work.
- Clarity:** Avoiding vague language and being precise about what you did.
- User Focus (in some options):** Mentioning user experience (UX) demonstrates that you consider the end user.

To choose the best option, consider:

- The specific role you're applying for:** What skills are they emphasizing?
- The overall tone of your resume:** Are you going for concise and direct, or more detailed?
- The length of your resume:** Can you afford a slightly longer bullet point?

Remember to tailor your resume to each job description. Good luck!
