Summary

Here are a few options for rewriting your summary, depending on the nuance you want to convey: ****Option 1 (Focus on Skills):**** > Highly motivated Computer Science graduate with a strong foundation in web development and a keen interest in leveraging AI and automation technologies to drive innovation. ****Option 2 (Focus on Career Goals):**** > Recent Computer Science graduate seeking opportunities in AI and automation, building upon a solid background in web development to create impactful solutions. ****Option 3 (More Concise):**** > Computer Science graduate with expertise in web development and a passion for advancing AI and automation capabilities. ****Option 4 (Action-Oriented):**** > Computer Science graduate eager to apply web development skills and a passion for AI and automation to contribute to challenging and innovative projects. ****Key improvements in these options:**** * ****Replaced "I am" with stronger language:**** Using phrases like "Highly motivated" or "Seeking opportunities" sounds more proactive and confident. * ****Replaced "experience" with "strong foundation" or "expertise":**** More professional vocabulary. * ****Added value/purpose:**** Mentioning "drive innovation" or "create impactful solutions" shows you're thinking about the bigger picture. * ****Improved sentence structure:**** The phrasing is more polished and flows better. Choose the option that best aligns with your current goals and the message you want to convey. Consider tailoring it further based on the specific job or opportunity you're pursuing.

Experience

• **Frontend Developer** at ET Inclusive Finance (2022–2024)

Here are a few options to polish the job description, depending on the specific context and what you want to highlight. I've aimed to make it more impactful and quantifiable. ****Option 1 (Focus on Results):**** > Developed and implemented multiple user interfaces for fintech applications using React, resulting in a 40% performance improvement. ****Why this is better:**** * More active verbs ("Developed and implemented") * Clearly states the result upfront. ****Option 2 (Adding Context):**** > Leveraged React to design and build multiple user interfaces for [mention specific type, e.g., mobile banking, trading platform] fintech applications, leading to a 40% increase in application performance through optimization strategies. ****Why this is better:**** * Provides more detail about the type of fintech applications. * Specifies that the performance improvement was achieved through optimization strategies. ****Option 3 (Highlighting Skills):**** > Proficiently developed user interfaces for multiple fintech applications using React, incorporating performance optimization techniques that resulted in a 40% improvement. ****Why this is better:**** * Highlights your proficiency with React. * Emphasizes the use of performance optimization techniques. ****Option 4 (More Detailed):**** > Designed, developed, and deployed multiple user interfaces for [mention specific type, e.g., loan

origination, investment management] fintech products using React. Implemented performance optimization strategies that resulted in a 40% reduction in load times and improved overall user experience. **Why this is better:** * Adds "designed and deployed" to show full lifecycle involvement. * Quantifies the performance improvement further (reduction in load times). * Explicitly mentions improved user experience. **Option 5 (Concise and Strong):** > Built high-performance React-based user interfaces for multiple fintech applications, achieving a 40% performance improvement. **Why this is better:** * Concise and easy to read. * Uses strong verbs ("Built"). * Highlights that the UIs are "high-performance". **Key Improvements in general:** * **Stronger Verbs:** Using verbs like "developed," "implemented," "designed," "built," or "leveraged" makes the description more active and impactful. * **Quantifiable Results:** Including the "40% performance improvement" is excellent. Try to add context. Did you reduce load times? Increase transaction speeds? * **Context and Specifics:** If possible, mention the specific types of fintech applications (e.g., mobile banking, payments, trading platforms). * **Skills Emphasis:** Consider using words like "proficiently," "expertly," or mentioning specific performance optimization techniques you used. * **Impact on User Experience:** If the performance improvement led to a better user experience, state that explicitly. * **Action-Oriented:** Frame your accomplishments in a way that shows you took initiative and delivered results. Choose the option that best fits the specific job description and the skills you want to highlight. Remember to tailor it to each application! Good luck!

Education

- **BSc in Computer Science** at Bahir Dar University (2015–2019)

Skills

React, Node.js, SQL Server, Firebase, Docker, Git, Python

Languages

Amharic, English

Projects

- **Employee Management System:** A full (stack system for managing employees - React, Express, SQL Server)
