Professional Summary

Okay, I understand. You're saying I need the actual text of the professional summary before I can rewrite it. Please provide the text of the professional summary you want me to improve. I'm ready to help make it more compelling for a technical position!

Professional Experience

Software Engineer
ET Inclusive Finance Technology | *2023*

Here are a few options, depending on the specific focus you want to highlight and the technologies involved. Choose the one that best fits the specific application you're targeting and the technologies you used. **Option 1 (Focus on Performance & Scalability):** * **Spearheaded the development and maintenance of critical fintech web applications, resulting in a 30% performance improvement through code optimization and strategic infrastructure enhancements.** (This is a strong and concise option) **Option 2 (Focus on User Experience & Impact):** * **Developed and maintained key features for fintech web applications, leading to a 30% improvement in application performance and a measurable increase in user satisfaction (provide specific metric if available, e.g., "a 15% increase in user retention").** **Option 3 (Focus on Specific Technologies & Methodologies):** * **Leveraged [Specific Framework/Language, e.g., React, Angular, Python] to develop and maintain high-performance fintech web applications, achieving a 30% reduction in page load times and optimizing database queries using [Specific Technology, e.g., PostgreSQL, MongoDB] for improved efficiency.** (This highlights the technologies you know.) **Option 4 (More Detailed, if you have more to say):** * **Played a key role in developing and maintaining a suite of fintech web applications. Successfully optimized application performance by 30% through [Specific Actions, e.g., code refactoring, database indexing, caching strategies], resulting in [Quantifiable Benefit, e.g., reduced server costs, improved user experience, increased transaction throughput].** **Option 5 (Focus on Specific features and technologies):** * **Designed, developed, and maintained core features for fintech web

applications using [Framework/Language, e.g., Java Spring Boot, Node.js, and React]. Improved overall application performance by 30% through [Specific actions, e.g., implementing caching mechanisms, optimizing database queries, and improving front-end rendering].** **Key Improvements & Why They Work:** * **Action Verbs:** Using strong action verbs like "Spearheaded," "Leveraged," "Optimized," "Designed," "Developed" makes you sound proactive. * **Quantifiable Results:** Focuses on the 30% improvement. * **Specificity:** The best options add details about *how* you achieved the performance gains (code optimization, database improvements, etc.) and the tools used. * **Impact:** Try to connect the improvement to a business benefit (e.g., user satisfaction, reduced costs, increased revenue). If you know the specific impact, include it. * **Keywords:** Includes relevant keywords that recruiters and Applicant Tracking Systems (ATS) might be looking for (e.g., "fintech," "web applications," specific technologies). **Before you choose:** * **Tailor to the Job Description:** Read the job description you're applying for carefully. If they emphasize a particular skill or technology, make sure your bullet point reflects that. * **Be Honest:** Don't exaggerate your accomplishments. You should be able to discuss them in detail during an interview. * **Use Numbers:** Quantifiable results (like the 30% improvement) are much more impactful than vague statements. Remember to keep the bullet points concise and easy to read. Good luck!

Education

BSc Computer Science
Bahir Dar University | *2014-2018*

Technical Skills

JavaScript React Node.js Python SQL Server

Languages

English Amharic Afaan Oromo

Projects

Employee Management System

Rewrite this project description professionally, highlighting impact and technologies used (stack application for HR management - React, Express, SQL Server): A full
